COMPANY

65 YEARS OF RESEARCH, INNOVATION, DEVELOPMENT AND DESIGN

OLI - Sistemas Sanitários, S.A., founded in 1954 in Aveiro, is currently the Iberian leader in the production of cisterns. A wide range of solutions, such as control plates, in-wall and exposed flushing cisterns, and mechanisms (inlet valves and outlet valves) are sent daily to 80 countries on five continents. In addition, OLI has branches in Italy, Germany and Russia.

OLI flushing cisterns can be found in bathrooms all over the world, such as a hotel in Cuba, an Israeli hospital, a school in Spain, a football stadium in Qatar, a boat Hotel in Peru, or a restaurant in Italy. This international recognition is based on innovation.

From its large and modern industrial complex, in Aveiro, which operates 24 hours a day and seven days a week, 2 million cisterns and 2.8 million mechanisms are produced each year.

To compete globally OLI continuously invests in innovation, having applied, in the last five years, 10 million euros in Research and Development. Using patented technology and high quality manufacturing standards, OLI is constantly studying new and better solutions that increase water efficiency and accessibility for people with reduced mobility.

Currently, OLI has 34 active patents and according to the report of the European Patent Office for the last four years is among the Portuguese companies with the most patents in Europe and is considered the most innovative in the construction sector.

OLI's innovative work has been recognized with several distinctions, namely Archiproducs Design Awards, Good Design, Iconic Awards and Design Plus, and IF Design.

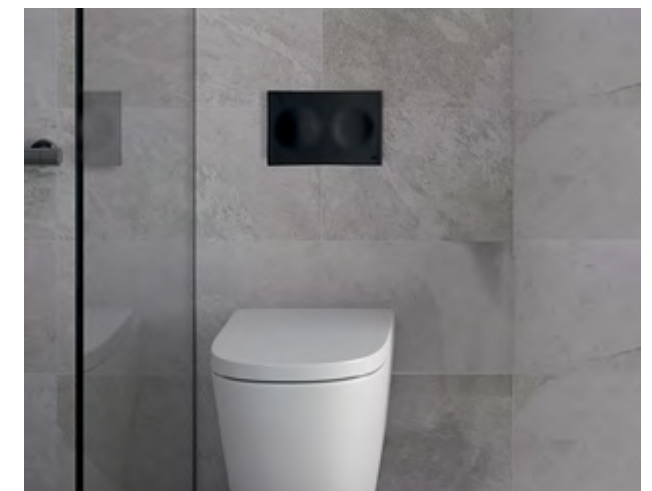

In 2019, OLI closed the year with a turnover of 59.3 million euros and a total of 431 employees in Portugal. OLI is part of the Italian group Silmar, which operates in 5 different yet integrated sectors: heating, aluminium processing, plumbing, electroplating and passive fire protection - and employs about 3,000 people.

RESEARCH & DEVELOPMENT

On a daily basis, and in partnership with universities, research centres and architects, OLI's Research and Development Centre works on the development of new ideas and solutions that increase water efficiency and accessibility for people with reduced mobility in the bathroom.

For 65 years OLI has been committed to growing sustainably, by investing in new products and markets. OLI's global success can be attributed in large part to the continuous effort to improve products and anticipate market needs.

INNOVATION

Innovation defines OLI. The slogan "Inspired by water" manifests OLI's commitment to place innovation in the service of water preservation, with the overall goal of making the world a better place to live. In the last five years, OLI has invested 10 million euros in research and innovation. Currently, OLI has 45 active patents and is one of the Portuguese companies with most patents in Europe.

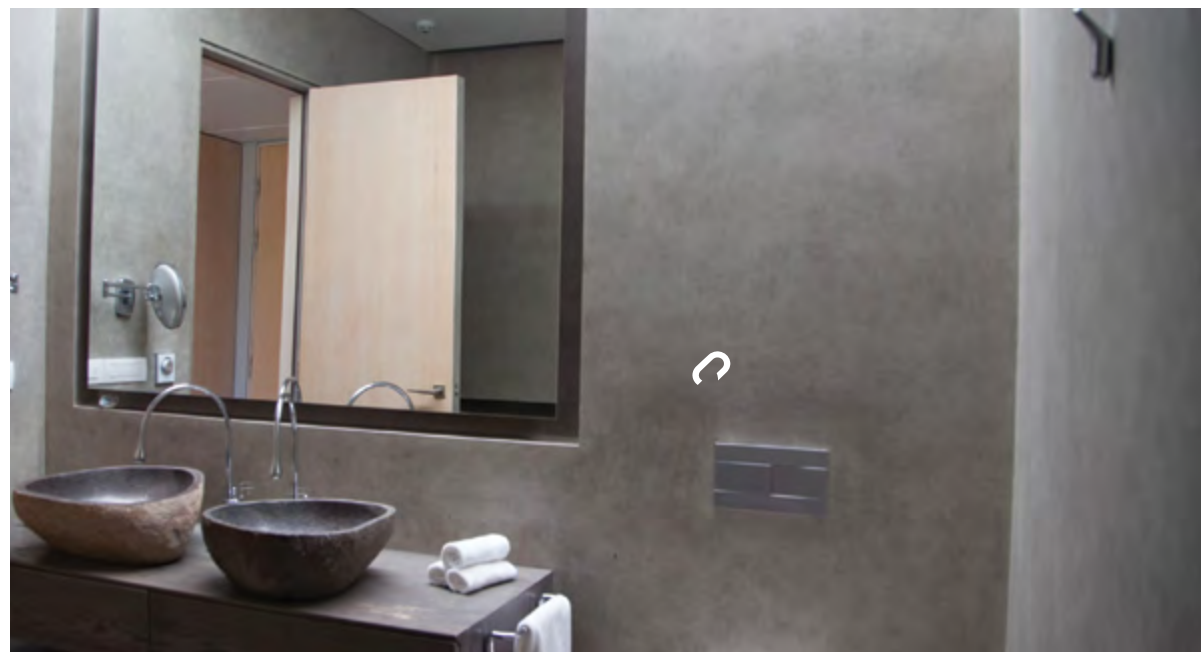

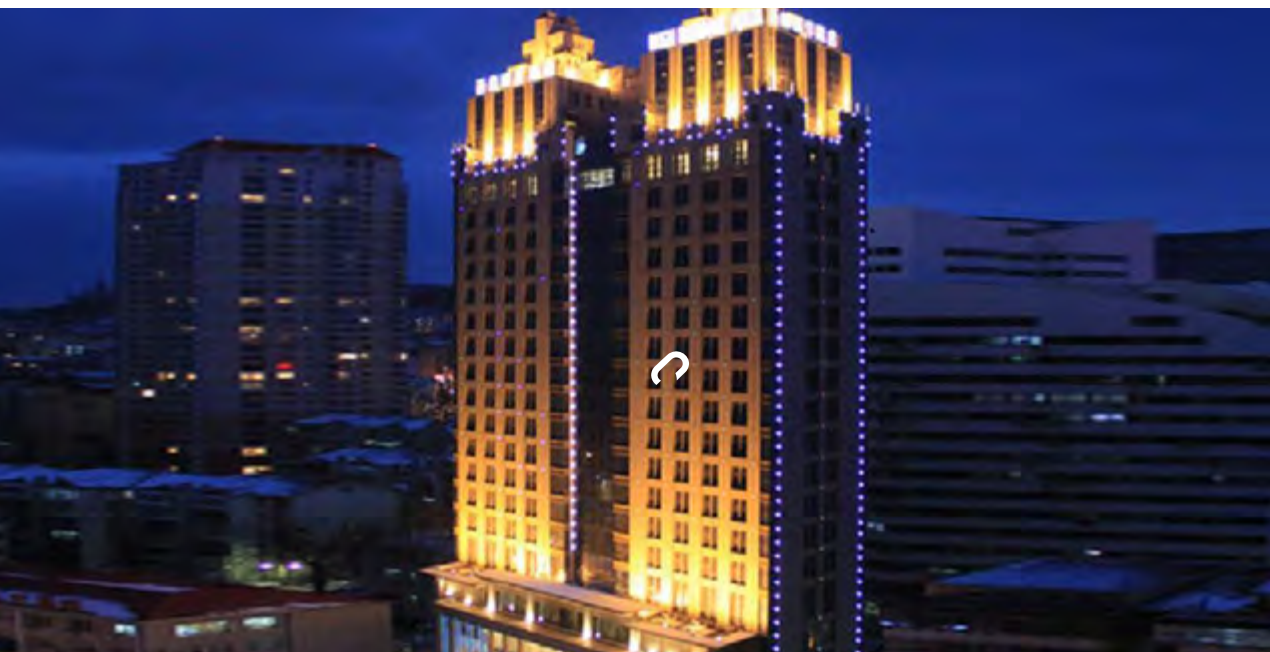

RESEARCH, DEVELOPMENT AND INNOVATION

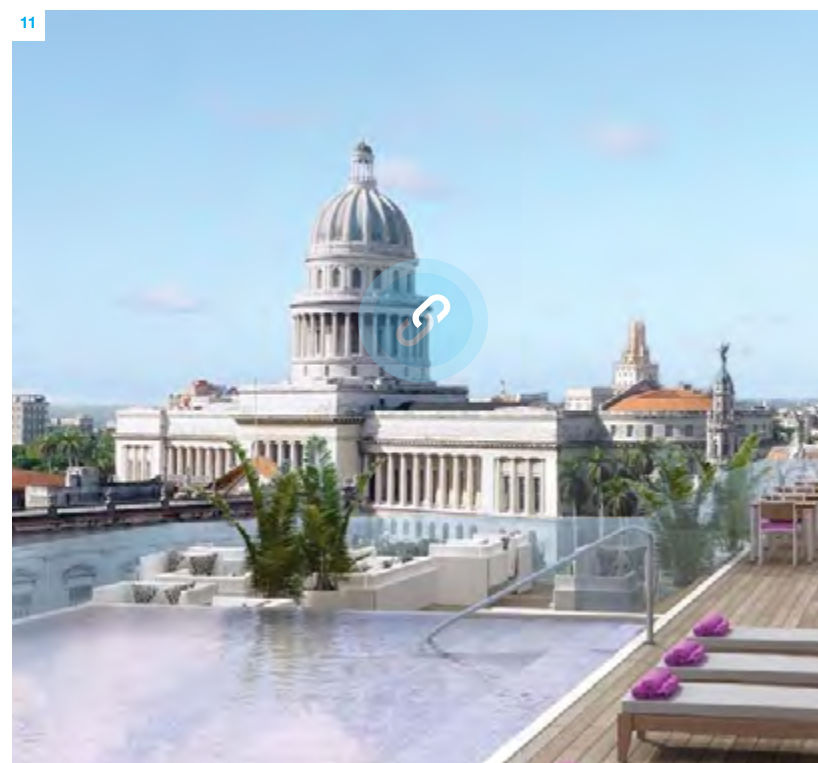

DESIGN

In addition to being sustainable and accessible, OLI solutions are also characterized by their contemporary design with simple and refined lines.

OLI strives to offer sustainable products that not only have a strong functional component, but allow our customers to design a truly unique bathroom that they can be proud of.

WATER-SAVING SOLUTIONS

INLET VALVE
(see product range on [page 162](#))

FILLS THE CISTERN FASTER
Delayed refill system

QUIETER
Operating noise reduced

OLI74 PLUS 4/2l

Save water with every flush.

When compared to OLI74 PLUS 6/3l you save 2 litres with every full flush and 1 litre with every half flush.

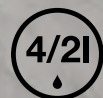

(see product range on [page 70](#))

OLI74 PLUS with 2 INLET VALVES

Save water by connecting your cistern to a second water source, such as rainwater.

(see product range on [page 70](#))

OLI74 PLUS 4/2l with 2 INLET VALVES

Combines both of the water efficient solutions above to help you maximize your water saving.

(see product range on [page 70](#))

OUTLET VALVE
(see product range on [page 167](#))

ADDITIONAL WATER-SAVING
Adjust the volume of water flushed.

DUAL FLUSH

Water-saving of approximately 50%.

OLIpure®

- **Universal:**
Compatible with existing WC liquid* disinfectants on the market.
- **Long lasting:**
Storage capacity of 450ml.

*The use of chlorine-free liquid detergents with a viscosity between 150 and 300 cp (at 20 ° C) is recommended.

OLI

OLI

BIM

OLIPure is a closed-storage system with a disinfectant that is placed inside the cistern and with each flush releases the disinfectant into the toilet. The disinfectant is always in a closed circuit and never comes in contact with the water in the cistern, unlike traditional cleaning tablets that come in contact with water. This reduces the risk of the disinfectant damaging components in the cistern.

OLIPure creates a fresh atmosphere and provides an immediate feeling of comfort and cleanliness, without any effort.

BUILDING INFORMATION MODELING

(BIM)

OLI is committed to being at the forefront of development in the construction sector. BIM is the new standard of design and construction. BIM facilitates the transfer of information between stakeholders and enables integrated management throughout the product life cycle.

With this methodology, OLI aims to boost the efficiency and creativity of construction projects through cooperative work with architects, engineers, contractors and owners, as well as reinforce its commitment to continuous innovation and the creation of a bathroom that doesn't waste water, is safe and accessible for all.

OLI will continue to progressively expand their library and offer customers a wide range of Sanitary System solutions. OLI's products are available as BIM objects in Graphisoft Archicad®, Autodesk Revit® and SketchUp®.

ColorADD

Innovation and Social Vanguard

OLI is the first sanitary systems company in the world to adopt ColorADD, a unique, universal and transversal code that allows colour blind people to correctly identify colours.

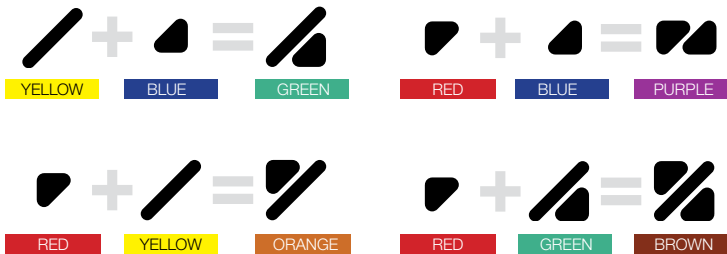

Primary colours. Black and white

Colour blindness is a visual disorder of inherited transmission characterized by the inability to distinguish colours.

There are around 350 million colour blind people in the world. ColorADD represents the 3 Primary Colours through graphic symbols. Based on the concept of "Colour Addition", symbols can relate to each other and all colours can be graphically identified. White and Black indicate Light and Dark shades of Colour.

EASY MOVE washbasin

- Adjustable frame for washbasin;
- Ergonomic system that is adjustable in height by 300mm;
- Compatible with the most wall hung washbasins;
- Silent electric engine;
- Power supply 220V/110 (50/60Hz);
- Power: 350 Watt;
- Insulation: IP66;
- Movement velocity: of 28mm/s;
- Sheet of tempered glass 6mm thick;
- Push power: 6000N (ca 600kgf);
- Limit switch;
- Frame tested for a 400kg load;
- Easy and quick installation with fast fit system;
- Available tempered glass bottom cover in black or white;
- Frame and glass are sold separately;
- Global warranty of 10 years and 2 years on electronic components.

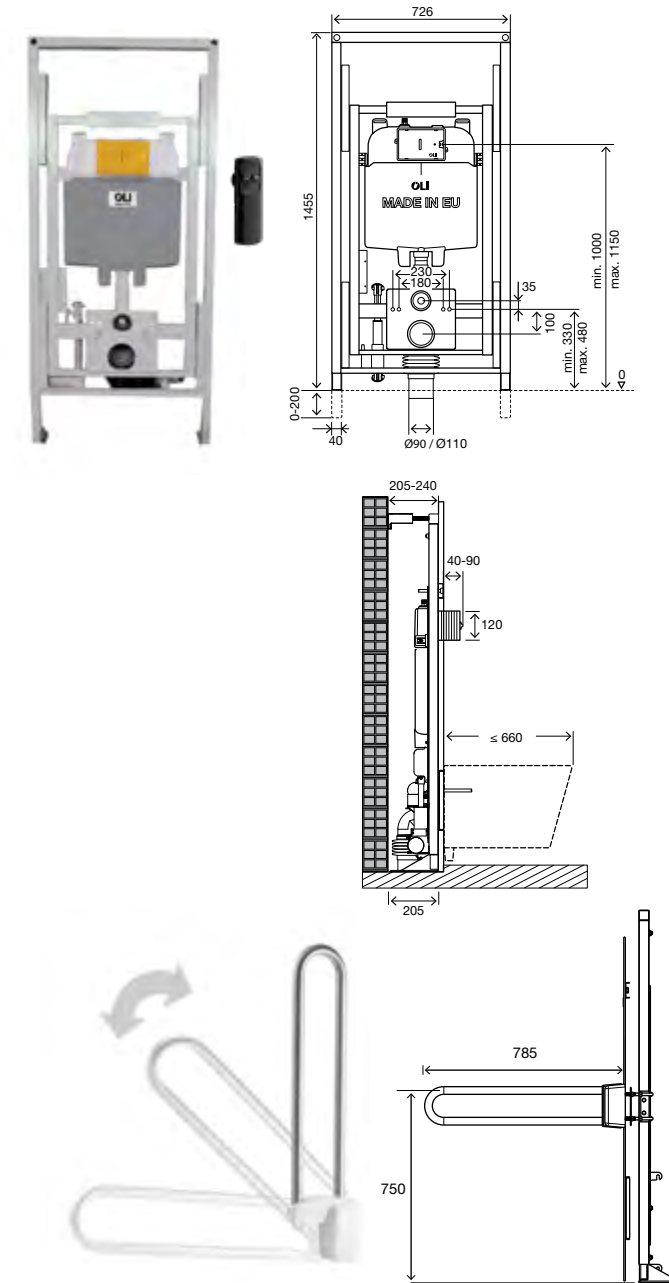

Included

- Mirror;
- Flexible outlet pipe;
- Concealed siphon;
- Wireless remote actuation;
- Electric engine;
- 2x G 1/2" water connections;
- 2x flexible hoses;
- Wall-fixing material and washbasin fixing material.

EASY MOVE WC

- Adjustable frame with OLI74 PLUS dual flush cistern 6/3 litres (see characteristics on page 66);
- Ergonomic system that is adjustable in height by 150mm;
- Compatible with all wall-hung wc pans;
- Wall hung toilets up to 660mm long;
- Silent electric engine;
- Power supply: 220V/110 (50/60Hz);
- Power: 350 Watt;
- Insulation: IP66;
- Movement velocity of: 28mm/s;
- Sheet of tempered glass 6mm thick;
- Push power: 6000N (ca 600kgf);
- Traction power 3000N (ca 300kgf);
- Limit switch;
- Frame tested for a 400kg load;
- Easy and quick installation with fast fit system;
- Available tempered glass front cover in black or white (6x400x1345mm);
- Frame and glass are sold separately;
- Control plate not included;
- Global warranty of 10 years and 2 years on the electronic components.

Included

- Extensible outlet pipe;
- Remote actuation, wireless;
- Electric engine;
- Wall-fixing material and pan fixing material;
- Inlet and outlet pan connection.

SANITARY MODULE

A universal and versatile solution for a quick and easy renovation of your bathroom.

NO-TOUCH

With No-touch technology there is no need to touch the module to activate the flush. The tempered glass is equipped with capacitive sensors and the user can choose between the half flush and the full flush by simply approaching their hand to the corresponding light symbol. With No-touch, hygiene and convenience are taken to a new level, by adopting a clean and sustainable technology.

PNEUMATIC

The pneumatic version comes with a stainless steel tilt selector button in a matt finish for activating the flush. The user can choose between the full flush and the half flush by pressing the tilt selector button. The button's rounded shape provides the sanitary module with nobility and distinctiveness. With the pneumatic version you are a touch of a button away from the perfect bathroom.

QR-INOX

Sanitary Module - Floor

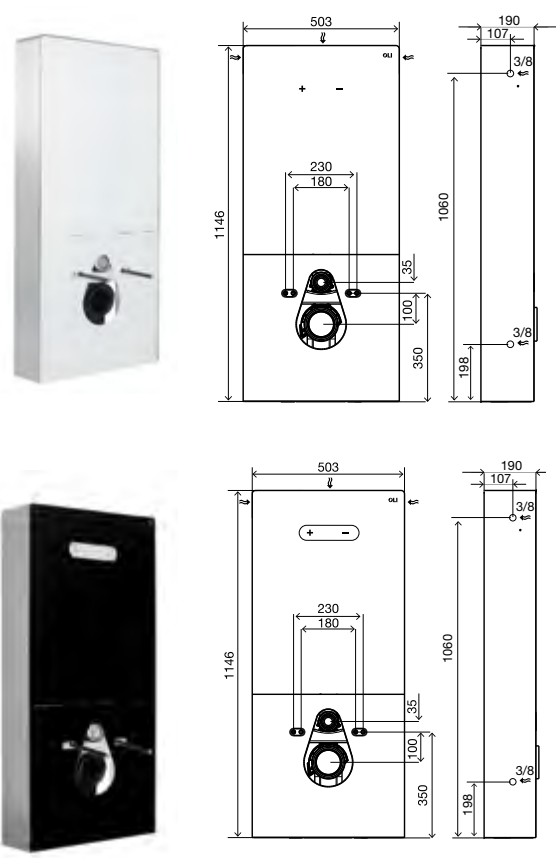

- Dual flush Sanitary Module 6/3 litres;
- Compatible with all floor mounted WC pans;
- One piece, brushed stainless steel lateral frame;
- 6mm tempered glass front panel (split in two parts);
- Delayed refilling – PLUS technology inlet valve;
- Silent inlet valve;
- Supplied with anti-condensation lining;
- 4 external water entry positions and one back water entry position available;
- 108mm thick;
- QR-INOX Button - Pneumatic actuation;
- QR-INOX No-touch – Capacitive sensor with Hydroboost or AC;
- Equipped with OLI74 PLUS cistern;
- EN 14055 CE marking;
- Global warranty of 10 years and 2 years on the electronic components.

Included

- Internal frame fixing material;
- WC connection pipe Ø45;
- Flush pipe included (220 to 570mm);
- G ½” stop valve.

IN-WALL INSTALLATION SYSTEMS

DIRECT

This wall installation system should be selected when installing the cistern in a solid wall that will be brick-lined with a **floor-standing toilet**.

SIMFLEX

This wall installation system should be selected when installing the cistern in a solid wall that will be brick lined with a **wall-hung toilet**.

BLOCK

This installation system is for wall-hung toilets and should be used when installing the cistern in a solid wall that will be brick-lined.

The Block installation system is also distinguished by the fact that it has a full EPS coating, giving it a **strong acoustic resistance**.

SANITARBLOCK

The Sanitarblock installation system is suitable for applications in drywall with load bearing walls. The main advantage of the system is the ease and speed of safely installing a cistern with a **wall-hung toilet**. The Sanitarblock system is equipped with a Fast-fit system for fixing the frame to the load bearing walls.

Fast-fit

- wall fixation system included;
- simplifies the fixation of the frame to the wall;
- allows for a fast and precise levelling of the frame;
- patented system.

FREE-STANDING

The Sanitarblock free-standing installation system is used in drywall applications with a **wall-hung toilet**. The main advantage of the system is the ease and speed of safely installing a concealed cistern with a wall hung toilet without the need of any type of wall.

DOUBLE

The Sanitarblock free-standing double installation system is ideal for drywall application with a **wall-hung toilet**. This system includes one frame with two cisterns which allows the application of a wall-hung toilet "back-to-back". This makes the Sanitarblock free-standing double ideal for commercial spaces.

LED that can be turn on independently of the extractor.

Note: Happy air performance may be different depending on the WC.

HAPPY AIR
High extraction capacity (80m³/h)
Removes 30% of odours
Removes 70% of condensation

- Melanine filter – noise reduction;
- Turns off as soon as the client turns off the switch;
- 220V/50Hz;
- Capacity 65m³/h- 22W 31dB;
- Capacity 80m³/h- 29W 35dB.

HAPPY AIR PLUS
High extraction capacity (100m³/h)
Removes 30% of odours
Removes 70% of condensation

- Melanine filter – noise reduction;
- 960 Lumen LED that can be turn on independently of the extractor;
- Humidity sensor that can be set to automatically turn on;
- Possible to adjust the operating time after the user switches the switch off (2min-20min);
- Capacity 100m³/h- 12W 34dB;
- Capacity 80m³/h- 20W 38dB.

General features

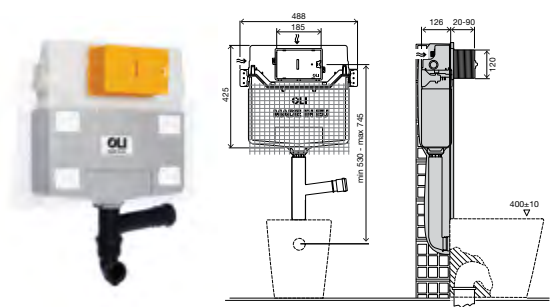

- Dual function on a single aspiration fan;
- It can be installed on the wall or on the ceiling;
- Reduced noise <38 dB(A);
- High aspiration capacity 65-80 m³/h (HAPPY AIR) and 85-100m³/h (HAPPY AIR PLUS) (30% odours, 70%condensation);
- Power Supply: 220V (50Hz); Insulation: IP35;
- The extractor fan operates at 220 V/50 Hz
- Activated by switch or sensor;
- 2 to 20 minute delay switch-off possible with HAPPY AIR PLUS;
- Anti-back flow valve;
- Paintable cover panel;
- Compatible with OLI74 Plus Happy Air, OLI120 plus Happy Air and all its control plates (see compatible control plates page 118);
- Global warranty of 10 years and 2 years on the electronic components.

Happy Air system Includes:

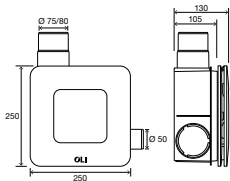

- Inner air filter;
- Fixing material;
- Electrical fan;
- Fan housing;
- Covering plate.

MOON

- One-piece in white or black ceramic material;
- Dual flush;
- No-touch actuation through capacitive sensors;
- Compatible with Hydroboost or AC system;
- Hygienic and easy to clean;
- Gull-Wing opening system, which prevents damages;
- Anti-error electronic connections;
- Waterproof connectors;
- 2 year warranty.

No-touch actuation

The use of capacitive sensors enabled OLI to develop the concept around a one-piece ceramic plate with innovative formal and tactile features that ensure superior hygiene levels and ergonomics.

Simple and intuitive

The simple and elegant design of the Moon plate combines high technology with tradition, resulting in a smooth and comfortable interface for the user, whose elegance of shapes highlights the dual flush and favours the half flush.

Hydroboost

- Uses the energy of water in motion;
- Generates and stores power from the water that fills the toilet tank;
- Energy is used to activate the flush;
- There is no need to connect to the power grid or to replace batteries;
- Self-sustainable;
- Self-sufficient sensor actuation system;
- Suitable for intensive use.

AC POWER-MAINS

- Innovative concept with capacitive sensors;
- Easy installation;
- Plug and Play.

CODE

DESCRIPTION

878848 MOON White

878981 MOON Black

NOTE: See compatible control plates on page 116.

measurements are in mm 119

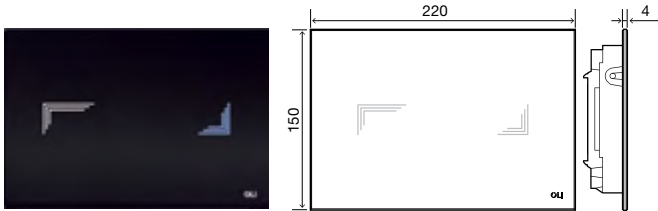

Green is a Trend Sustainability is a Mindset

Features a new and improved capacitive sensor with enhanced capabilities. OLI's brand new control plate presents itself with two distinct power options.

"I am very pleased with the prestigious "Best of Category 2016" award for the Trumpet control plate. The quality achieved is due to the competent and committed contribution of the technicians at OLI. It was a pleasure to evolve the design of the control plate with them.

Álvaro Siza "

Siza Vieira

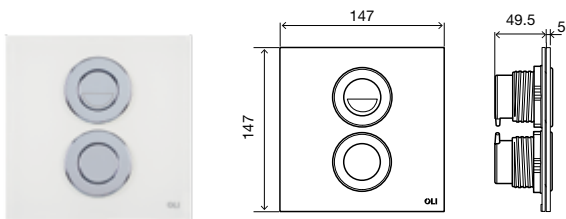

Siza Vieira - one of the most prestigious and renowned Portuguese architects, with a Pritzker Prize and the Golden Lion for Lifetime Achievement, to name a few - designed a true masterpiece, inspired in an instrument played by great maestros: the trumpet. OLI is proud to present the "Trumpet", the perfect balance between a truly unique design and exceptional music.

Álvaro Siza Vieira is a world-renowned architect who has collected several international awards, Pritzker Prize in 1992; The Wolf Prize of Arts in 2001; the Golden Lion for Lifetime Achievement in 2012; the Fritz Hoyer award in 2014, just to name a few. The Trumpet control plate was designed by Álvaro Siza Vieira and is the perfect combination of elegance and harmony, both characteristics of a trumpet. In 2016, the "Trumpet" was selected "Best of Category" for the "Archiproducts Design Awards" one of the most prestigious awards of Architecture and Design worldwide.

SM15

- Designed by Architect Souto de Moura;
- Dual flush;
- Pneumatic actuation;
- Actuation force <20N;
- Installation on the surface wall with 150mm x150mm tiles;
- White tempered glass material;
- 2 year warranty.

CODE	DESCRIPTION
022238	○ □ SM15 White tempered glass

The support and inspection plate has the necessary dimensions to apply the control plate and two Portuguese tiles in the extremities, in order to ensure access to the in-wall cistern for maintenance.

Compatibility

Matching urinal control plate also available.
(see page 134 for more information)

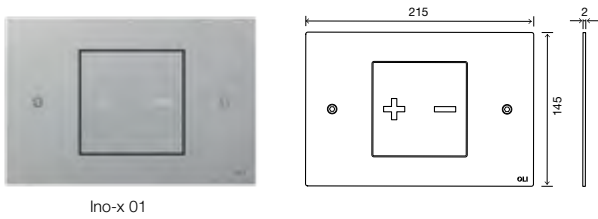

Eduardo Souto de Moura

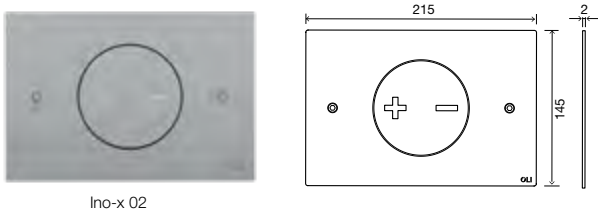

Souto de Moura is a renowned Portuguese architect who has been presented with various international awards, such as, the Gold Medal of Heinrich Tessenow Foundation in 2001; the Pritzker Award in 2011; the Wolf Prize of Arts in 2013; just to name a few. In 2001, in collaboration with OLI, Souto de Moura developed the SM15 for the new Pousada of Portugal in Covilhã.

- Designed by Architect Romano Adolini;
- Dual flush;
- Mechanical actuation;
- Actuation force < 20 N;
- 2 mm thick;
- Tilttable button;
- Vandal resistant;
- Stainless steel material;
- 2 year warranty.

Romano Adolini

The INO-X control plate collection was designed by Romano Adolini, an Italian architect and designer who is an influential figure in bathroom design.

The INO-X collection is simple, elegant and with a strong visual impact: "A simple sheet of steel that is only 2mm thick cut with a precise laser".

OCEANIA MIA

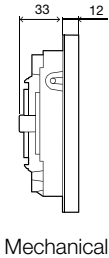

An infinite world of custom-made finishings

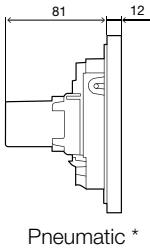

Customize your Oceania with your preferred finishing with any 10-mm-thick material. The Oceania Mia control plate is provided with a high-resistance dual-adhesive glue for easy application of any front finishing of your choice.

For the finishing of your control plate to be perfect, this version is provided with a stainless steel frame and matt chrome push button.

Choose the finishing of your preference and treat yourself to a unique control plate.

EASY DUAL

Easy Dual promotes hygiene and is ideal for people with reduced mobility. The protruding buttons are easy to push and the full flush or the half flush can be easily activated with the touch of an elbow, for example.

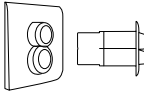

- Dual flush;
- Pneumatic actuation;
- Compatible with all pneumatic in-wall cisterns;
- ABS control plate;
- Vandal resistant;
- Adjustable buttons: 0mm, 18mm or 32mm
- 2 year warranty.

Not meant to be used in the opening of the in-wall cistern. An inspection plate (see page 133) should be applied to ensure access to the cistern. Pre-installation necessary.

879119	 	eAQUA URINAL Inox BATT
879123		Urinal concealed pre installation

- Brushed stainless-steel front plate;
- Double infrared sensors (with automatic setting feature);
- Dynamic sensor: constantly adjusts the optimum range;
- Temporary-off (cleaning) and short-on (manual flush) activated with touch;
- Flush time and sensor sensitivity adjustable with touch;
- 24- or 48-hour hygienic flush and pre-flush activate with touch;
- Compatible with ECO URINAL FRAME, URINAL Sanitarblock and DOUBLE FRAME WC/URINAL/ WASHBASIN;
- The flush valve has to be installed before closing the wall;
- Vandal resistant;
- 2 year warranty.

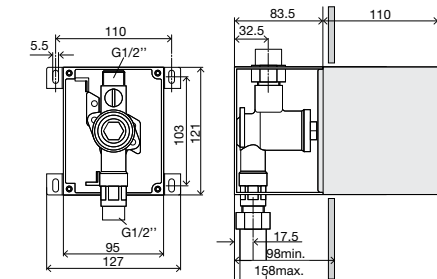

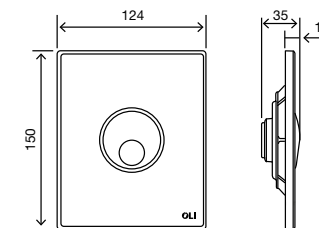

Urinal concealed pre installation

- Operating pressure: 0.3 - 10 bar;
- Flow rate: ca. 20 l/min. (3 bar);
- 6V Lithium CRP 2 (standard: life time up to 4 years) / mains power supply 230V/6V;
- Standards: DIN EN 200; CE.

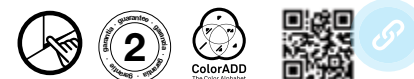

Matching ELECTRA control
plate also available.

COMMERCIAL

The wide range of OLI control plates are characterized by their versatility and durability. Designed with cutting edge technology they are suitable for all bathrooms, whether they are public bathrooms or private bathrooms.

OLI has the perfect control plate for any situation. From infrared sensors that allow flushing without having to touch the control plate to models that are highly resistant for public bathrooms.

Vandal resistant

OLI control plates are ideal for commercial applications.

100% Hygienic

Equipped with an infrared sensor, Electra II and Electra III control plates flush without touching the control plate. 100% Hygienic.

EXPOSED FLUSH CISTERNS

OLI flush cisterns are made with bright thermoplastic material that is resistant to knocks and scratches. Some models are accessible in a wide range of colours, as well as the traditional white. They are available in three different versions: close-coupled; medium to low position and high position. The close-coupled version (fitted directly onto the ceramic pan) is ideal for the replacement of ceramic cisterns.

QUARZO

Medium-low Position

- Dual flush 6/3 litres (adjustable to 9/4 litres in the outlet valve);
- Medium/low level installation;
- Acoustic and anti-condensation internal lining;
- Silent inlet valve;
- 145mm thick;
- Adjustable wall fixation system;
- Water supply connections - Three positions*;
- Some versions compliant with: EN 14055 CE marking;
- Class "A" for the Water Efficiency in compliance with the ANQIP Authority requirements;
- White PS material;
- 5 year warranty.

CODE DESCRIPTION

124427 ○ QUARZO

880599 ○ QUARZO OLIpure

OLIpure the right solution for perfect hygiene in the bathroom.

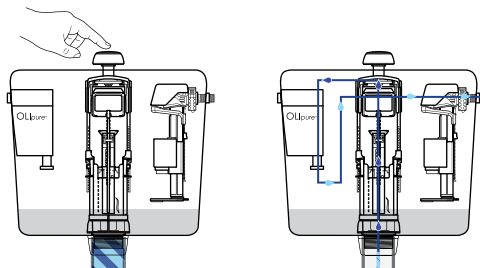

Internal system that pumps cleaning liquid in each flush. This way the cleaning liquid is always in a closed circuit, unlike traditional cleaning tablets that are always in contact with water, causing possible damages to components in the cistern.

- Easy, fast and simple refilling of the cleaning liquid, through a small opening on the side of the cistern.

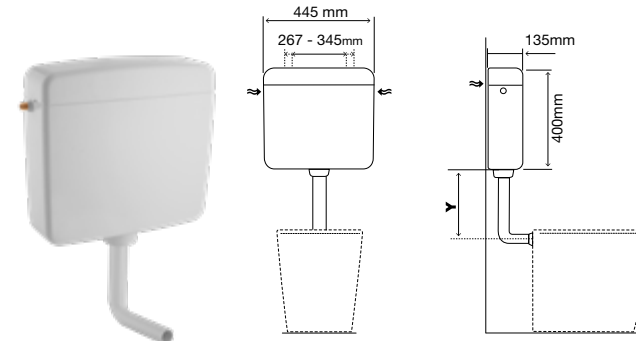

- Universal - Compatible with every WC liquid ** cleaning product;

- Long lasting, 450ml maximum capacity.

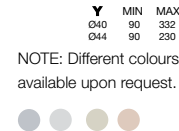

TOPAZIO DD

Medium-low Position

NOTE: Different colours available upon request.

CODE DESCRIPTION

416201 ○ TOPAZIO DD with 1/2" stop valve

416501 ○ TOPAZIO DD

UNIVERSAL MECHANISMS

Universal inlet and outlet valves for ceramic cisterns

Easy and quick installation

OLI is a leading European producer of mechanisms for ceramic cisterns and its quality is recognized by the most important international bodies. The extremely silent inlet valves and the elevated performance levels of our outlet valves are tested under strict laboratory conditions before being introduced to the market.

AG 104 PLUS
Inlet valve

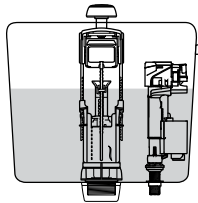

SAVES UP TO **9L**
OF WATER PER DAY

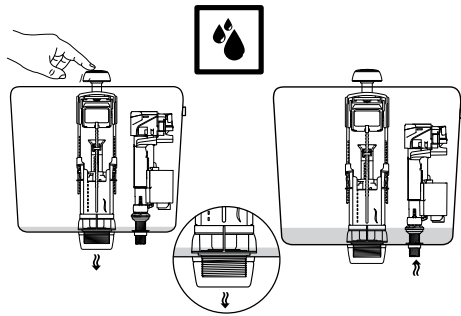

- New back flow protection to prevent contamination;
- Compliant with UK standards;
- Side or bottom water supply connection;
- 1/2" plastic connection;
- Delayed refilling inlet valve: it starts after the outlet valve is in the closed position;
- Easy maintenance without the need to disconnect from the water connection;
- Dynamic pressure functioning range: 0.1 – 10 bar;
- Maximum static pressure: 16 bar;
- 10 year warranty.

INLET VALVE IN
CLOSED POSITION

OPERATION MODE
DUAL FLUSH

The AG104 PLUS inlet valve, with his delayed opening system, only opens the water after the flush valve closes. This system allows a water saving up to 0.5 liters in average in each full flush, resulting in a daily average saving of 9 liters.

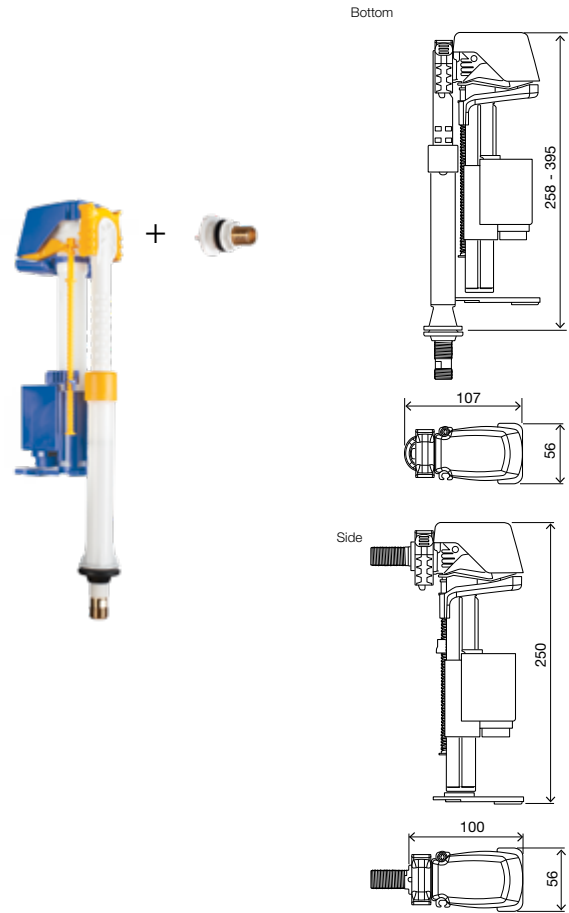

CODE	DESCRIPTION
883099	AG 104 PLUS side 1/2 plastic - bag
883103	AG 104 PLUS bottom 1/2 plastic - bag

AZOR PLUS
Inlet valve

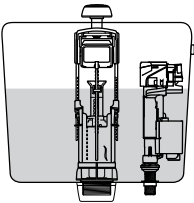

SAVES UP TO **9L**
OF WATER PER DAY

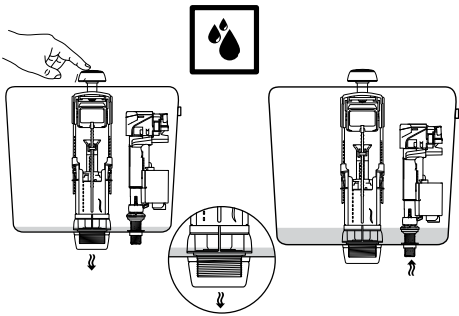

- Delayed refilling inlet valve: it starts after the outlet valve is in the closed position;
- Side and bottom water supply connection;
- Adjustable height in the bottom connection;
- Easy to install;
- Reduced dimensions;
- Side and bottom inlet valve, with 3/8" brass connection (also available in plastic or 1/2" plastic or brass);
- Counter pressure closing system (Hydraulic);
- Dynamic pressure functioning range: 0.1 – 14 bar;
- Maximum static pressure: 20 bar;
- Silent valve class I certified;
- Easy maintenance without the need to disconnect from the water connection;
- Anti-Backflow function;
- Some versions compliant with, KIWA and DVGW, UPC (side version);
- 10 year warranty.

INLET VALVE IN

APOLO

Outlet Valve

CODE	DESCRIPTION
882794	APOLO outlet valve bag
883098	APOLO outlet valve box

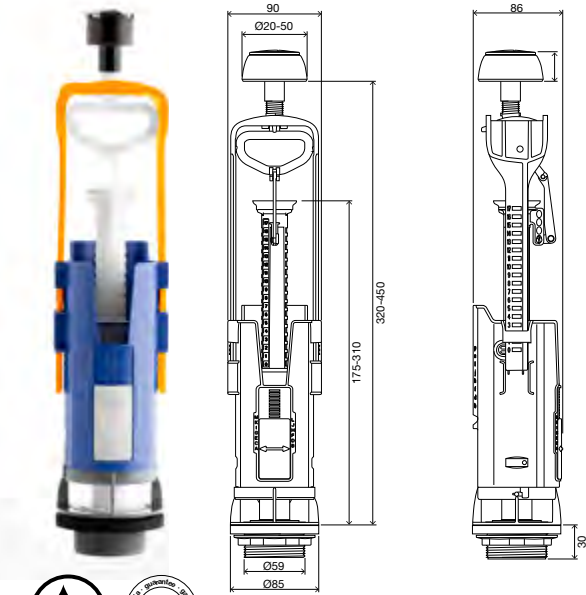

- Dual flush outlet valve with adjustable half and complete water flush volume;
- Universal top push button position that locks the ceramic lid;
- Lateral overflow pipe, higher and easy adjustment;
- Lock/unlock system at the top, one step;
- Allows the off center of the button in ceramic lid 360° with 10° of inclination for each axis
- Mechanical actuation <20N;
- High flow rate flush;
- Damping system – silent operation;
- Easy maintenance (bayonet system);
- Silicone seal;
- Some versions compliant with: Watermark;
- 10 year warranty.

Included

- Ceramic cistern fixation to the WC pan;
- WC pan seal foam (that compensates the ceramic irregularity);
- Self-adjustable chrome push button with rosette for cisterns with lid holes from Ø16 to Ø60mm.

BETA

Outlet Valve

CODE	DESCRIPTION
883215	BETA outlet valve bag

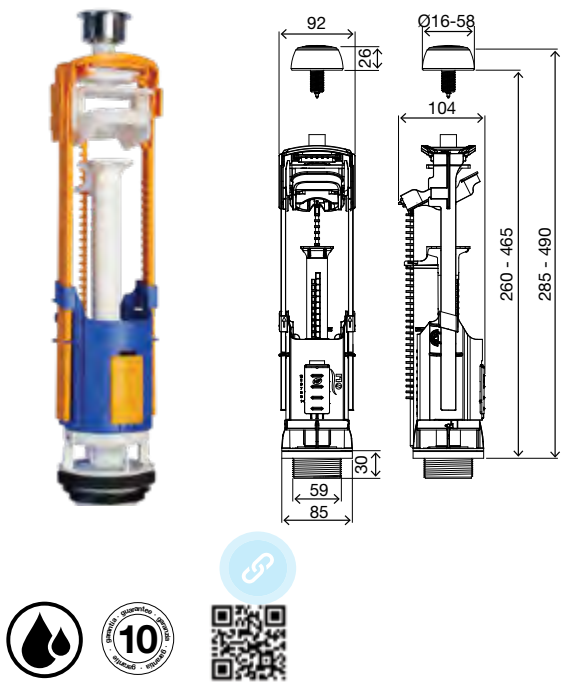

- Adjustable overflow pipe;
- Lever position is the same as the overflow pipe;
- Simpler adjustment of full / half flush;
- Efficient flush with high flow rate;
- Silent operation (damping system).

Included

- Ceramic cistern fixation to the WC pan;
- WC pan seal foam (that compensates the ceramic irregularity);
- Self-adjustable chrome push button with rosette for cisterns with lid holes from Ø 16 to Ø 60mm.

ATLAS
Outlet Valve

- Dual flush outlet valve with adjustable half and complete water flush volume;
- Universal top push button position that locks the ceramic lid;
- Allows the off center of the button on the ceramic lid (25mm on each axis);
- Mechanical actuation <20N;
- High flow rate flush;
- Damping system - silent operation;
- Adjustable telescopic overflow pipe and ajustable lever height;
- Easy maintenance (bayonet system);
- Silicone seal;
- Some versions compliant with: NF, WRAS, SAI, CQC and SIRIM;
- 10 year warranty.

Included

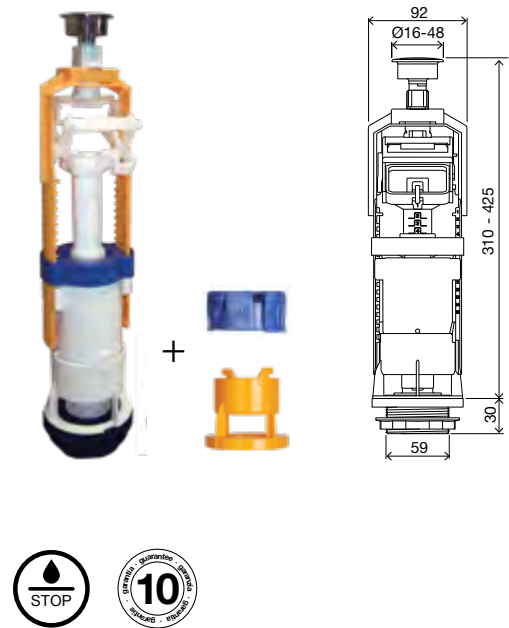

- Ceramic cistern fixation system to the WC pan;
- WC pan seal foam (that compensates the ceramic irregularity);
- Self-adjustable chrome push button with rosette for cisterns with lid holes from Ø16 to Ø60mm.

EASY ADJUSTMENT OF THE OVERFLOW PIPE

Universal adjustment according to the desired water level in different ceramic tanks with a telescopic overflow pipe.

EASY ADJUSTMENT OF THE FLUSH VOLUME

Residual adjustment of the half flush

Atlas allows you to adjust the half flush volume separately.

Residual adjustment of the complete flush

Slide the residual adjustment lever up and reduce the volume of the flush.

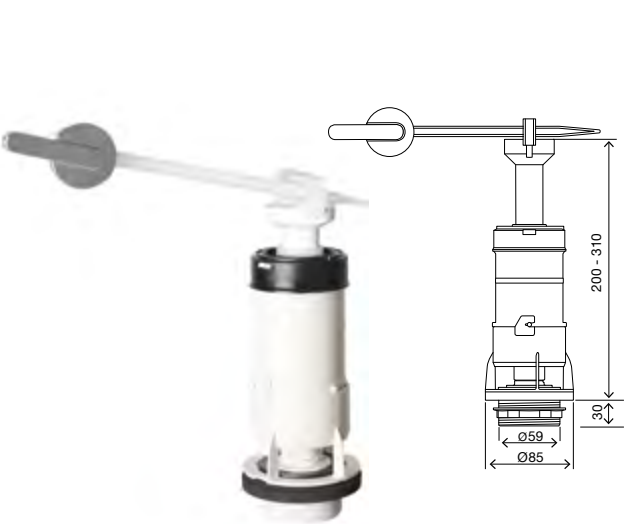

ONE PIECE VERSION

compatible with **ONE PIECE WC**

HANDLE

Outlet Valve

- Single flush outlet valve;
- Universal front handle button position;
- Mechanical actuation <20N;
- High flow rate flush;
- Adjustable telescopic overflow pipe;
- Easy installation and maintenance (bayonet system);
- EPDM seal;
- 10 year warranty.

Included

- Ceramic cistern fixation system to the WC pan;
- WC pan seal foam (that compensates the ceramic irregularity);
- Chrome handle button for cisterns with Ø16 hole.

CODE	DESCRIPTION
501420	HANDLE - box

PUSH ECO + UNI BOTTOM

Single flush mechanism kit, bottom connection

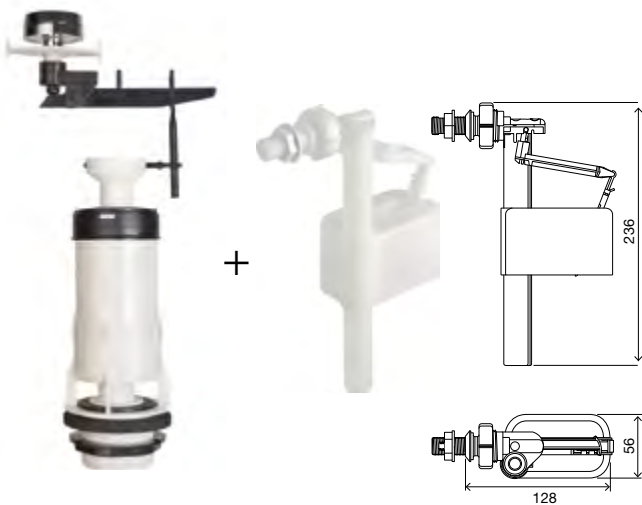

- Push Eco outlet valve (see page 172);
- Uni Bottom inlet valve 3/8" plastic connection (see page 166);
- 10 year warranty.

CODE	DESCRIPTION
501034	PUSH ECO + UNI BOTTOM - bag

PUSH ECO + ECO

Single flush mechanism kit, side connection

- Push Eco outlet valve (see page 173);
- Eco inlet valve:**
- Side inlet valve, with 3/8" plastic connection;
 - Piston closing system (Mechanical);
 - Dynamic pressure functioning range: 0.5 – 8 bar;
 - Maximum static pressure: 10 bar;
 - Anti-Backflow function;
 - 10 year warranty.

CODE	DESCRIPTION
501023	PUSH ECO + ECO - bag

FAST START/STOP + COMPACT

Start/stop flush mechanism kit, side connection

- Fast Start/Stop outlet valve (see page 169);
- Compact 3/8" inlet valve brass connection (see page 165);
- 10 year warranty.

CODE	DESCRIPTION
100023	FAST START/STOP + COMPACT - box
100022	FAST START/STOP + COMPACT - bag

FAST START/STOP + UNI BOTTOM

Start/stop flush mechanism kit, bottom connection

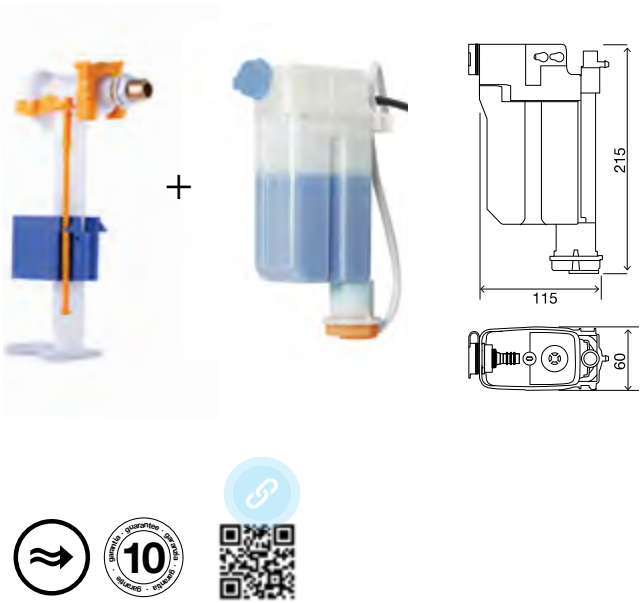

- Fast Start/Stop outlet valve (see page 169);
- Uni Bottom inlet valve 3/8" brass connection (see page 166);
- 10 year warranty.

CODE	DESCRIPTION
100032	FAST START/STOP + UNI BOTTOM - box
100031	FAST START/STOP + UNI BOTTOM - bag

OLIPURE KIT

Ceramic cisterns

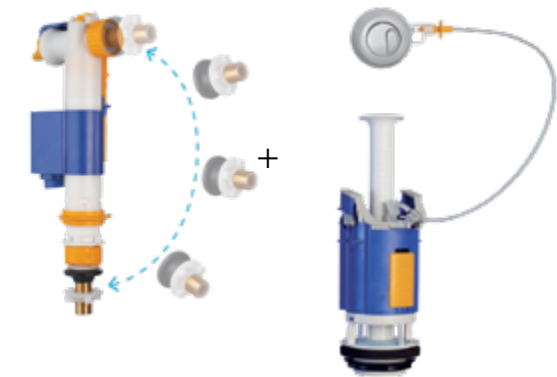

- Azor side 3/8" brass connection
- OLIPure system;
- 350mm Refill connection pipe;
- 130mm Outlet valve connection pipe;
- Only suitable for ceramic cisterns with side connections and QUARZO;
- 10 year warranty.

CODE	DESCRIPTION
101768	OLIPure kit - box

IVC100 + ATLAS CABLE

Dual flush mechanism kit, side/bottom connection

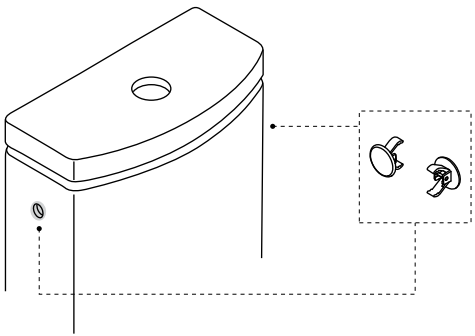

- Atlas cable outlet valve (see page 170);
- IVC100 inlet valve brass connection (see page 164);
- 10 year warranty.

CODE	DESCRIPTION
099938	IVC100 + ATLAS CABLE - bag
099939	IVC100 + ATLAS CABLE - box

WARRANTY TERMS

1.WARRANTY PERIODS for OLI products:

- a.In-wall flushing cisterns, bidet, washbasin and urinal frames - 10 (ten) years;
- b.Exposed flushing cisterns– 5 (five) years;
- c.Flushing mechanisms (inlet valves and outlet valves) – 10 (ten) years;
- d.Electronic components, fixtures, and fast-wearing parts, specifically rubber seals or similar products, push-buttons and control plates – 2 (two) years;
- e.All other products – 2 (two) years;

2.The warranty period starts on the purchase date by the first final Consumer. The sales document, corroborating the sales date of the OLI product and the respective serial number, certifies the start date of the warranty. In the event of a subsequent purchase, or any alteration in proprietorship or user, the warranty period shall continue for the remainder of the warranty period and shall continue unaltered relative to all other aspects of the warranty.

3.This warranty is also applicable to subsequent substitution parts for those determined to be defective until the end of the warranty period for the product of which they are a part, or up to two years after their application if the remaining warranty period for the product is less than two years. The repair or substitution of a product or a part does not renew the initial warranty period.

4.This warranty is only valid if the product has been correctly installed, in accordance with the installation instructions and the information contained in the catalogues and manuals provided by OLI. In situations where information is not covered in the aforementioned resources, installation should be carried out in accordance with the standards, rules and technical specifications contained in the legislation in effect, applicable to the type of devices and mechanisms in question. Before being sold, products must be stored in a dry place.

5.The applicability of this warranty also depends on the use considered to be normal for the products, the operating conditions (ex. pressure, temperature, etc.) and the type of liquid used, which should have values within the parameters indicated in the catalogues or manuals provided by OLI.

6.If the flush pipes are used for other liquids other than network water, the standards relative to the resistance of polyethylene (PE), polypropylene (PP) and polyvinyl chloride (PVC) should always be respected.

7.Products with missing parts or which are defective at the time of installation, as well as during pressure tests, should not be used.

8.OLI products should not be used with other products which do not have local national Quality Approvals/Certificates.

9.Any product return should be accompanied by a copy of the sales receipt, with the product in its original packaging, whenever possible.

10.This warranty is immediately terminated and is not extended to any equipment or part that has been damaged or become inoperative as

a result of the following:

- a) Accident, fall, fire, flooding and inappropriate, abusive or negligent use;
- b) Use of parts or accessories which have not been manufactured or provided by OLI, or whose provision and/or manufacture have not been expressly authorised by OLI;
- c) Unauthorised alterations to the equipment;
- d) Breaking of any warranty seal or removal of any label with the serial number or legally mandatory marking;
- e) Assistance, repairs or substitutions carried out by third parties other than OLI, an authorised reseller or certified technical centre.

11.Under no circumstances does the warranty cover the product's installation.

12.The products are packaged in duly identified packages which fulfil the requirements established in applicable national legislation. OLI cannot be held responsible for material or personal damage resulting from the incorrect or inappropriate use of the packages.

13.Failure to comply with any of the aforementioned clauses releases OLI from responsibilities pertaining to material damage and/or non-material damage which may result.

14.OLI recommends that the packaging materials of its products, after no longer being needed, should be recycled by the appropriate and socially responsible means and processes.

15.In the case of defects or non-conformity of OLI products, a written notification should be sent to the sales representative or OLI client manager within 60 days of becoming aware of the defect, as long as it was not previously visible, within reason. The appropriate measure shall then be taken to determine the possible defects detected. The notification may also occur by telephone, followed by a registered letter with acknowledgment of receipt within 24 hours to Customer Service, OLI – Sistemas Sanitários, S.A., Travessa do Milão, Esgueira, 3800-314 Aveiro (Portugal)

16.Failure to comply with the terms of the aforementioned number may result in the total or partial loss of the right to compensation or of the warranty itself.

17.The notification mentioned in Point 15 of this Warranty, issued by means of registered letter to OLI's Customer Service should contain the following information:

- a) Name, address and telephone number of the claimant;
- b) Identification of the product;
- c) Entity and place where the product was acquired (when not at OLI), as well as the respective purchase date;
- d) Address of the location where the product was installed;
- e) Description of the visible losses;
- f) Type of installation and the materials used (if the claimant has this information);
- g) Conditions of use, ex. type of system, pressure, temperature, etc. (if the claimant has this information);
- h) Name, address and telephone number of the company or person who installed the product.

18.Any personal information provided shall be used solely for processing the claim and for contact with the claimant and may be transmitted to the insurance provider to which civil responsibility for damages has been transferred.

19.Any obligation to repair, substitute, reduce the price or reimburse, if this should be the case, shall occur only for OLI products which have a visible marking or identifying logotype, with defects or non-conformities which have been proved through extensive technical verification. If it is concluded that the product is not defective, the expenses paid by OLI shall be invoiced to the claimant. The product's technical standards at the time of its manufacture shall be the basis for its conformity assessment.

20.OLI cannot be directly held responsible by the purchaser if the product's non-conformity results from actions by the resellers (or other commercial agents) of OLI products, namely when non-conformity results from statements made by the sales representative regarding the product, its qualities and use conditions, which are different from the product's indications and instructions, including the information contained in manuals and instruction guides provided with the products or published on the company's website.

21.The consumer's rights and obligations are established in the Legal Regime for the Sale and Warranty of Consumer Goods (Law-Decree No 67/2003, of 8th April, and its subsequent alterations, specifically those foreseen by Law-Decree No 84/2008, of 21st May), as well as the Consumer Protection Act (Law No 24/96, of 31st July).

22.Any litigation resulting from the terms or interpretation of the present warranty, or of the purchase and sales contract from which the warranty results, is regulated by Portuguese law and resolved in the court of the competent legal jurisdiction where the headquarters of the warranty provider, OLI, are located, with express waiver of any other, except in cases where OLI and the beneficiary of the warranty have agreed to settle the litigation in an arbitration court.

23.This warranty binds OLI according to its exact terms, except typographical errors.

[illegible]

For decades, OLI has been developing and producing sanitary installation systems aimed at innovation. The dual flush cistern and the inlet valve were two major inventions. Currently, OLI is a worldwide reference. OLI currently has over 34 active patents in Europe resulting from a continuous investment in Research and Development, guided by the constant challenge of water sustainability. Its know-how is acknowledged by its means and technologically advanced resources and the partnerships established with universities and research centres. In its factory in Aveiro, OLI controls the value chain: there, the idea emerges, the mould is produced, production takes place and the product is marketed in over 80 markets throughout the five continents. The rising importance of contemporary design and of the incorporation of new technologies and materials, clearly shown in the solutions presented in this catalogue, reaffirm OLI as a brand of excellence.
